Subject: Printers

Hi Jim,

We were able to get the two Laserjet 4000 printers added to the Retrofit service contract. If either of those printers has a problem (other than needing consumables) you can call Retrofit at 800-966-2222 opt 1 for service - or send an email to the helpdesk with cc to me and I'll take care of it.
Here are the SNs of the 2 printers:

Laserjet 4000n	LaserJet Printer	USMB258995	Drug Lab
Laserjet 4000n	LaserJet Printer	USEC018085	Drug Lab

You should also be getting that new printer from SLI that I sent the quote on if you have not already.

I'll keep an eye out for usable printers in good shape that can be used with the older DOS programs.
